

CPD EVENT –

Technical Visit to Development of the Loop(河套區發展)

Background

The visit will begin with an informative introduction at the Community Liaison Centre.“The Loop 河套科創建築館”, where the host will highlight the project’s goal of balancing development with nature conservation. The Loop will feature an Ecological Area (EA) that, along with the old Shenzhen River and surrounding fish ponds, will create a vibrant wetland habitat for birds and wildlife.

Participants will then tour the innovative technologies used in the project, including the falsework Stability Monitoring Device and AI Vehicle Access Control System. The technical portion of the visit will conclude with a Project BIM Adoption Forum, featuring BIM practice sharing on innovative bridge construction methodologies supported by 3D survey technology.
